

What we need from you

The new website is built. The public pages are already on it. Calculators, newsletter signup, contact forms, search, tax rates, due dates, and the newsletter feed no longer depend on the old host. This note is only the decisions and files needed to point the domain over.

Do not email passwords. No logins for the website, email, domain, portal, or payment accounts. Reply with the answers below, or have the current website company send the exports.

PLEASE REPLY WITH THESE

- 1 **DECISION** A yes to switch **yourfreshstartsolutions.com** to the new site.
- 2 **DOMAIN** Who will change the domain settings when it is time. You can do it yourself, or grant access at that moment. Do not send the password.
- 3 **EMAIL** Where **advisor@yourfreshstartsolutions.com** is hosted: Google, Microsoft, or the current website company. If you are not sure, say so.
- 4 **BEFORE THE SWITCH** Confirmation that this mailbox stays active after the old host is canceled. If they host the email, it has to be moved first. Contact forms and the newsletter box send to that address.
- 5 **EXPORT** The newsletter subscriber list from the current email system, as a spreadsheet of names and emails. The new site does not contain the old list.
- 6 **NEWSLETTERS** Whether you want issues from before 2026. January through August 2026 are already on the new site.
- 7 **PORTAL** A decision on the client portal. Recommended: leave it where it is. Moving the website does not move client logins, documents, or portal billing. If you want those files off the old company, ask them for an export before anything is canceled.
- 8 **KEEP THESE** Confirmation these stay in your name and stay on the site: Pay My Fee card processor, Cash App, Venmo, Gumroad ebooks, Facebook, LinkedIn, the YouTube SecureSend video, and the Google map.
- 9 **TIMING** A day that works for the switch. The mailbox, and any portal export, come first.
- 10 **OPTIONAL** Old website traffic stats, only if you want them. They are not required for the new site.

The order of the switch

Nothing on the old host gets canceled until the domain is pointed and a test message arrives. The client portal is separate from the website.

DO NOT SEND

- Passwords or logins of any kind.
- The website editor, hosting, or portal password.
- Payment-account passwords.
- Anything for calculators, tax pages, search, or newsletter print. Those already run on the new site.

ALREADY ON THE NEW SITE

- Public pages, wording, and the same addresses ending in .php.
- All 147 financial calculators.
- Contact forms and newsletter signup, which open an email to the firm.
- Search, tax rates, due dates, IRS links, record retention, and state tax links.
- Newsletter issues from January through August 2026, plus the newsletter feed.

FIVE STEPS

1

You reply

Send the answers on page 1. No passwords.

2

Save what the old host is holding

Export the subscriber list. Leave the client portal up unless you decide otherwise. If email is on the old host, move it and confirm a message arrives.

3

Point the domain

You, or someone you authorize that day, point yourfreshstartsolutions.com to the new site.

4

Send a test

We each send a message through the contact form and confirm it arrives at advisor@yourfreshstartsolutions.com.

5

Then, and only then, cancel the old website host

Do not cancel it before the domain and the email are moved. If you still use the client portal, that portal account stays open.

DO NOT CANCEL THE OLD COMPANY FIRST

If that account closes before the mailbox is moved, the subscriber list is exported, and the domain is pointed, the email address and the client files can disappear with it. The public website can move. The client portal does not move with it.

Reply with the ten items on page 1 and the switch can be scheduled.
